

COMPLETEFUL

BRAND GUIDELINES

Print on demand, personalization and 3PL fulfillment under one roof.
Lafayette, Louisiana.

VERSION 1.0 · SEPTEMBER 2026 · BUILT FROM THE PRODUCTION SITE TOKENS

01 BRAND FOUNDATION

Completeful is the only 3PL built for personalized products. Traditional fulfillment centers ship pre-made inventory. Completeful engraves, prints, embroiders and assembles on demand, then ships from a single warehouse in Lafayette, Louisiana.

Positioning statement

3PL and print on demand under one roof. One vendor, one warehouse, one point of accountability, for brands whose products carry a customer's name on them.

Proof points

Claim	Detail
98.7% order accuracy	Correct item, quantity, personalization and address. Errors fixed at Completeful's expense.
Operating since 2019	Lafayette, Louisiana facility.
45% US coverage in 2 to 4 days	Ground shipping from Lafayette.
Under 1% personalization error rate	Errors remade free and expedited.
Dedicated account manager	Named human, M to F 8am to 5pm, 24 hour response.

Capabilities to name by their real names

Laser engraving. UV printing. Embroidery. DTG apparel. Custom assembly and kitting. Warehousing and pick, pack, ship. Integrations with Shopify, TikTok Shop and Etsy.

Voice

SOUNDS LIKE COMPLETEFUL	DOES NOT SOUND LIKE COMPLETEFUL
Direct and operational. Specific numbers over adjectives. Names the failure the customer already had with another vendor, then names the fix. Short sentences. Second person. Confident without hype. <i>"Stop juggling multiple vendors. We personalize on demand and ship direct, all under one roof."</i>	Corporate logistics filler. Unbacked superlatives. Vague promises with no number attached. Startup hype language. Exclamation points. <i>"We are passionate about revolutionizing your fulfillment journey!"</i>

Naming

Completeful, one word, capital C, no space, no hyphen. Never "Complete Ful", "CompleteFul" or "Completefull". Social handle `@completefultech` .

02 LOGO

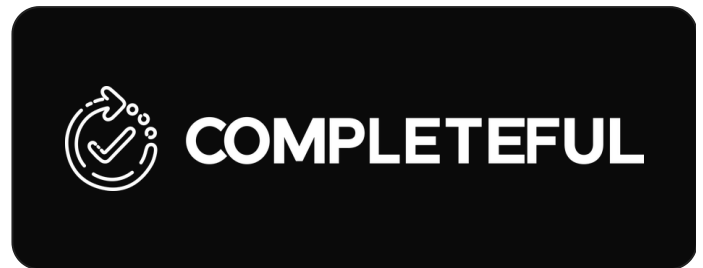

The mark is a circular arrow closing a loop around a checkmark: an order going out and coming back complete. It works locked up with the wordmark, or alone once the audience knows the brand.

Primary lockup

The gradient horizontal lockup is the default. Use it on white and on light neutral surfaces.

Primary, gradient, on white

Knockout white, on dark

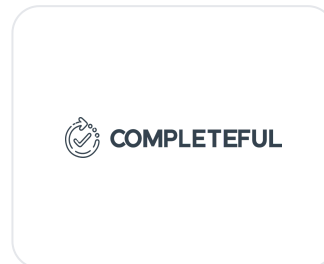

Full variant set

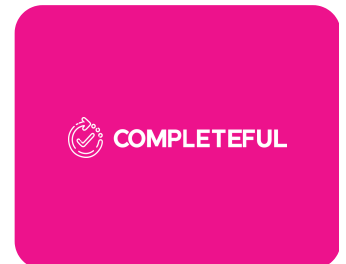

Solid pink

Solid black

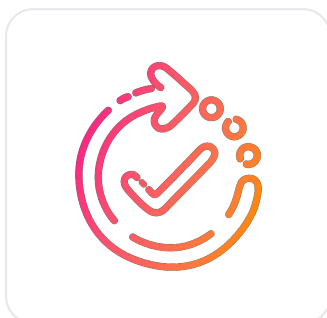

Navy

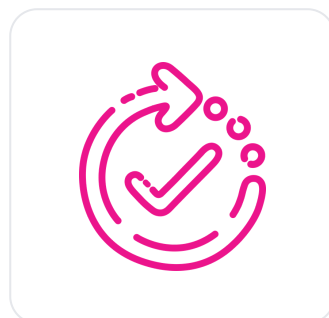

White on pink

Emblem

Use the emblem alone for avatars, app icons, favicons, packing tape, embroidery on small areas and any square placement. Do not recreate the wordmark next to it by hand, use the lockup file instead.

Gradient

Pink

White

Black

Clear space

Keep clear space around the logo equal to the height of the emblem's circle, on all four sides. Nothing enters that zone: no text, no rules, no photo edges, no other logos.

COMPLETEFUL

Minimum size

Asset	Digital minimum	Print minimum
Horizontal lockup	140 px wide	1.25 in / 32 mm wide
Emblem alone	24 px	0.35 in / 9 mm
Emblem, embroidery	n/a	0.75 in / 19 mm, single pink thread, drop the gradient

Backgrounds

On white and light neutrals use the gradient or pink lockup. On black, navy or pink use the white knockout. On photography, place the white knockout over a dark, low detail area, or add a solid brand-color band behind it. Never place the gradient logo on a colored background.

DO

- Use the supplied files at their supplied proportions
- Scale from a corner so the aspect ratio holds
- Switch to white knockout the moment contrast drops
- Use the SVG for anything above 800 px wide or anything printed

DO NOT

- Recolor, add strokes, shadows, bevels or glows
- Stretch, condense, rotate or skew
- Put the gradient lockup on colored or busy backgrounds
- Rebuild the wordmark in another typeface
- Box the logo in a shape that is not in this kit
- Use the emblem and wordmark at different tints

03 COLOR

One pink carries the brand. Orange exists only to end the gradient and to accent. Navy and neutrals do the structural work.

Core palette

Completeful Pink
HEX #ED128C
RGB 237 18 140
CMYK 0 92 41 7

Primary. Logo, primary buttons, links, active states.

Pink Deep
HEX #C4106A
RGB 196 16 106
CMYK 0 92 46 23

Hover state. Required for pink text under 18px.

Completeful Orange
HEX #FF6B35
RGB 255 107 53
CMYK 0 58 79 0

Accent and gradient end. Never body text on white.

Completeful Navy
HEX #34424E
RGB 52 66 78
CMYK 33 15 0 69

Outline buttons, secondary UI, dark text on light.

Completeful Blush
HEX #E2C2C4
RGB 226 194 196
CMYK 0 14 13 11

Soft neutral. Dividers, muted fills, packaging.

White
HEX #FFFFFF
RGB 255 255 255
CMYK 0 0 0 0

Primary surface and logo knockout.

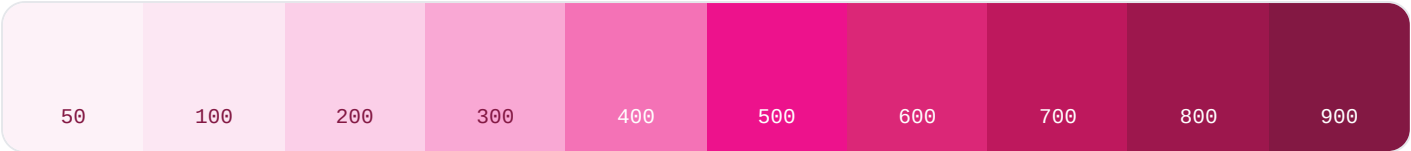

Signature gradient

Use	Value
Primary gradient	linear-gradient(135deg, #FF2B92 0%, #FF8433 100%)
Hover gradient	linear-gradient(135deg, #E00072 0%, #D63501 100%)

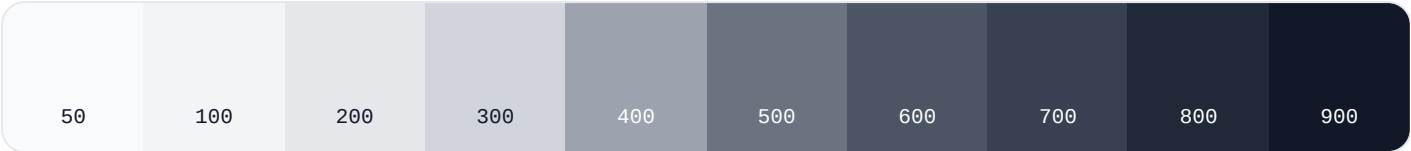

The gradient runs 135 degrees, pink at top left to orange at bottom right, always. It belongs on the logo, primary CTAs and single emphasized words in a headline. It does not belong behind body copy, across full page backgrounds, or in more than one place in the same view.

Pink scale

500 is the brand pink. Tints 50 to 200 are backgrounds. 600 to 900 are hovers, pressed states and text.

Neutral scale

Pastel accents

Lavender
#F3F0FF

Peach
#FFF4F0

Mint
#F0FFF7

Coral
#FFE8E8

Section backgrounds and card fills only. Never as text or icon colors.

Interface themes

Token	Dark (default)	Light
Background	#0A0A0A	#F9FAFB
Foreground	#E8E8E8	#111827
Card	#111111	#FFFFFF
Border	#262626	#E5E7EB
Muted	#202020	#F3F4F6
Muted foreground	#A3A3A3	#4B5563
Primary	#ED128C in both themes	

Contrast rules, measured

Pair	Ratio	Verdict
#ED128C on white	4.15:1	LARGE TEXT ONLY 18px+ or 14px bold. Fails for body copy.
#C4106A on white	5.79:1	PASSES AA Use this for any pink text under 18px.
White on #ED128C	4.15:1	LARGE TEXT ONLY Fine for uppercase button labels at 16px bold.
#FF6B35 on white	2.84:1	FAILS Decoration only. Never text.
#34424E on white	10.32:1	PASSES AAA
#ED128C on #0A0A0A	4.78:1	PASSES AA for normal text.

PRINT

CMYK values here are conversions, not press proofs. #ED128C sits outside CMYK gamut and will print duller on uncoated stock. For anything that matters, ask the printer for a spot match against a physical sample. No official Pantone is assigned to the brand yet, assigning one is on the open items list.

04 TYPOGRAPHY

Two families. Owners sets everything that shouts. Inter sets everything that explains.

Family	Role	Weights	License
Owners	Headlines, buttons, navbar, section titles	700, 800	MCKL Type, commercial. Included with Adobe Fonts.
Inter	Body, UI, labels, badges	400, 500, 600, 700	SIL OFL, ships in this kit
Work Sans	Body alternate	400 to 700	SIL OFL, ships in this kit
Archivo	Approved Owners fallback	700, 800, 900	SIL OFL, ships in this kit

FIX THIS IN THE SITE BUILD

`globals.css` imports Owners from `api.fontshare.com`. Owners is not published on Fontshare, so that request returns an empty stylesheet and every heading falls back to whatever the visitor has installed. Either embed Owners through an Adobe Fonts web project or set the heading stack to Archivo, which is in `03_Fonts/`.

Type scale

HERO HEADLINE

Owners ExtraBold 800
clamp(36px, 6vw, 48px)
line-height 1.1
letter-spacing -0.5px
UPPERCASE

Section heading

Owners Bold 700
24px to 36px responsive
line-height 1.2
letter-spacing -0.5px

Subsection heading

Owners Bold 700
24px / 1.3 / -0.5px

Subheadline. One sentence that carries the promise and the proof.

Inter Medium 500
18px / 1.6
#444444
16px on mobile

Body copy. Sixteen pixels on mobile, eighteen from 768px up. Line height 1.6 throughout, measure capped near 70 characters.

Inter Regular 400
16px / 1.6
#444444

Product label

Inter Medium 500
14px, tracking 0.2px
Capitalize

Badge and micro copy

Inter Regular 400
13px

BUTTON LABEL

Owners Bold 700
16px, tracking 1px
UPPERCASE
14px / 0.8px on mobile

Rules

DO

- Set headlines uppercase with tight negative tracking
- Keep body copy sentence case at 1.6 line height
- Use gradient text on one word per headline at most
- Let Inter carry every paragraph, table and form label

DO NOT

- Set body copy in Owners
- Mix Inter and Work Sans in the same block
- Add a third display face for one campaign
- Set headlines in all caps under 14px without tracking
- Use light weights, the brand is bold or regular

05 COMPONENTS

These are the production specs, not approximations. Copy them from

LEARN MORE

Type	Fill	Hover	Use
Primary	#ED128C, white label	#C4106A, lift 2px, shadow deepens	The one main action on a page
Gradient	135deg #FF2B92 to #FF8433	#E00072 to #D63501, lift and scale 1.02	Hero CTA only, one per screen
Secondary	2px pink outline, pink label	Fills pink, label goes white	Second action beside a primary
Outline	2px navy outline, navy label	Fills navy, label goes white	Low emphasis, dense UI

All buttons: 8px radius, uppercase, 1px tracking, Owners Bold, 14px padding block and 24px inline. Press state drops to scale 0.98. Transitions run 300ms ease out.

Cards

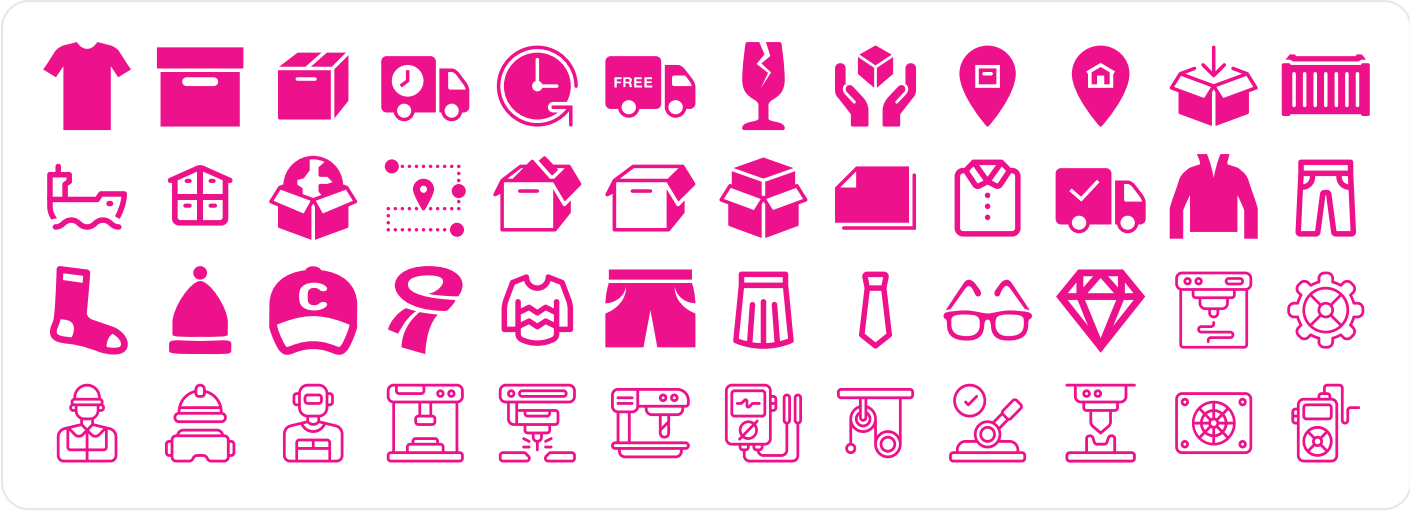

White fill, 1px #E5E7EB border, 1.5rem radius, 1.5rem padding, no resting shadow. On hover the border shifts to `rgba(237, 18, 140, .2)`, a soft pink shadow appears and the card lifts 2px. Radius ladder: `xl 1rem`, `2xl 1.5rem`, `3xl 2rem`.

Motion

300ms, ease out, on transform and shadow. Lifts are 2px. Scales are 1.02 up and 0.98 down. Nothing bounces, nothing spins.

06 ICONOGRAPHY

134 line and glyph icons covering apparel, packaging, shipping states and manufacturing equipment. Three color builds ship: black, pink and currentColor.

Rules

Context	Build	Color
Web and app UI	SVG_CurrentColor	Inherits text color, recolor with CSS
Brand marketing, decks, one pagers	SVG_Pink	#ED128C
Print, labels, documents	SVG_Black	#000000

Sit icons on a 24px box in UI. Pair them with a text label unless the meaning is universal. Do not fill icons with the gradient, do not outline them, do not mix icon sets inside one screen.

KNOWN GAP

The set was assembled from several sources, so viewBoxes vary across 26, 32, 50 and 64 units and stroke weights are not uniform. Icons look consistent within a group but not always across groups. Standardizing to a single 24px grid with one stroke weight is on the open items list.

07 PHOTOGRAPHY AND GRAPHICS

Real facility, real product, real hands. Completeful sells operational credibility, so the imagery has to look like a working warehouse, not a stock photo.

Subjects that work

The Lafayette warehouse floor and racking. Machines mid-run: laser engraver, UV printer, embroidery head, DTG. Personalized product close ups where the customer's name is legible. Packed boxes with branded inserts. People working, hands in frame.

Treatment

Natural light, neutral white balance, no heavy filters. Keep pink as an accent inside the frame, never as an overlay across it. Text over photography needs either a dark low detail area or a solid brand color band.

Process graphics

The four step "order to doorstep" infographic set lives in [07_Photography_Graphics/](#). Keep the four step structure: Connect your store, Send us your inventory, We pick, personalize and pack, Fast shipping.

08 APPLICATIONS

Surface	Asset	Notes
Website header	Horizontal gradient PNG or SVG	Around 180px wide, links to home
Favicon and app icons	01_Logos/App_Icons/	16, 32, 180 apple touch, 192 and 512 android
Social profile	Emblem gradient 512	Emblem centered, generous padding, white or black field
Open graph and link previews	01_Logos/Social/open_graph_1200x630.jpg	1200 × 630
Email signature	Horizontal pink 400w PNG	Cap at 180px wide, PNG not SVG for client support
Slide decks	White knockout on dark cover, pink on light interior	Owners for titles, Inter for body
Packing slips and inserts	Solid pink or black horizontal	One color print, skip the gradient
Packing tape and boxes	Emblem plus wordmark, one color	Gradient will not survive flexo, use solid pink
Embroidery and engraving	Emblem, single color, 0.75in minimum	Simplify, drop the gradient
Vehicle and signage	SVG only	Never scale a PNG for large format

09 OPEN ITEMS

Honest list of what this kit does not yet have, in priority order.

#	Item	Why it matters
1	Fix the Owners font import on completeful.com	Every heading on the live site is currently rendering in a fallback face
2	Confirm the Owners license covers web embedding	Adobe Fonts covers it under Creative Cloud, a direct MCKL desktop license does not
3	Locate the original vector source for the logo	The SVGs here were traced from high resolution PNG at 3000 and 8000px, accurate but not the master. An AI or EPS master should replace them if it exists
4	Assign a Pantone for pink	Needed for consistent packaging, tape, apparel and signage
5	Standardize the icon set to one grid and stroke weight	Four different viewBox sizes in the current set
6	Reconcile the Canva brand kit with this document	The Canva kit lists Gotham and SF Pro Display, neither is used in the product. Update Canva to Owners, Inter, Work Sans
7	Stacked and vertical lockup	No square or stacked version exists for narrow placements
8	Photography library	Only process infographics and a handful of site images exist today
